***Claim Objections***

1. Claims 1, 15, 54 and 55 are objected to because of the following informalities: in all four claims, the phrase “the relative movement of the guide wire body *of* the endoscope” (e.g., line 16 of claim 1) should be –the relative movement of the guide wire body *to* the endoscope--.

Appropriate correction is required.

***Claim Rejections - 35 USC § 102***

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

3. Claims 1-5, 8-10 and 54 are rejected under 35 U.S.C. 102(a) as being anticipated by Whayne et al. (U.S. Pat. 6,071,279) for the reasons set forth in numbered paragraph 3 of the previous Office Action, paper number 20060911.

Claim 54 is identical to previous claim 1 and is thus rejected for the reasons previously set forth with respect to claim 1. As to the newly added limitation in claim 1, note Figure 17B which shows the retainer (100) and the guide wire body (106) as being parallel over a length.

***Claim Rejections - 35 USC § 103***

4. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Art Unit: 3739

5. Claims 13 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Whayne et al. in view of Dake et al. (U.S. Pat. 4,927,418) for the reasons set forth in numbered paragraph 5 of the previous Office Action, paper number 20060911.

***Double Patenting***

6. Claim 55 is objected to under 37 CFR 1.75 as being a substantial duplicate of claim 15. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

***Allowable Subject Matter***

7. Claims 15 and 16 are allowed.

8. Claims 6, 7, 11 and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

9. Applicant's arguments filed January 5, 2007 have been fully considered but they are not persuasive.

Although Applicant contends that the wire (106) and sleeve (32) are not arranged in parallel over a length between the distal and proximal portion of the sleeve (its is assumed that Applicant meant retainer (100) instead of sleeve (32) since the Examiner previously equated the retainer with element 100), it is noted that for at least part of a length, these two elements are arranged parallel, as shown in Figure 17B. Therefore, the previous rejections are being maintained.

All other issues either have been previously addressed or are addressed above.

### ***Conclusion***

10. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
